

STAINLESS STEEL HOPPER

ROURA STAINLESS STEEL HOPPERS

Roura manufactures many of its standard hopper sizes and designs with stainless steel bodies. The material of choice is usually an austenitic stainless steel body with a hot dipped galvanized mild steel base. As an option, the bases can be painted or epoxy coated. Roura is one of a very few self-dumping hopper manufacturers that specializes in this option. The product has special appeal in the chemical and food and beverage industries. Roura custom produces these hoppers to your requirements. **Call a Roura representative for a quote.**
