OPTIONAL PARTS FOR THE RACKS

A-Frame Options

A-Frame Additional Truss Support

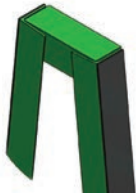

An additional A-Frame cross-member option is available for purchase for unique specific requirements.

A-Frame Rubber Cushion

The Roura optional A-frame rubber cushion (RSR-093) is designed to provide addition protection to the slab products.

A-Frame Trays

Roura manufactures 2 different size storage tray options for our stand A-Frame (RAF-60). The upper storage tray (RAF-60-UT) and the lower storage tray (RAF-60-LT) are designed to mount inside of the A-Frame unit to hold backsplash remnants. This option is a great floor space saver and provides additional storage protection for backsplash remnants. Each tray is sold separately.

Slab Rack Options

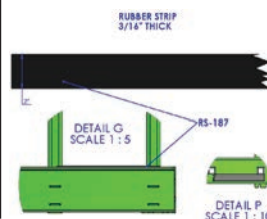

Back Splash Rack

The Roura optional backsplash bracket set (RSR-60-BSP) is designed to hold long lengths of remnant backsplash product on the slab racks. The RSR-60-BSP comes with two 60" tall steel fabricated brackets that are welded together for superior strength. Rubber cushion protection is applied to all shelf arms to protect finish edges. The brackets come in a set of 2 that fit perfectly into all Roura slab racks.

Slab and Remnant Rack Options

Slab and Remnant Rubber Cushion

The Roura Slab & Remnant rack rubber cushion option (RS-187 & RS-093) is designed to provide addition protection to the slab and remnant products.

COMPANY OVERVIEW

Roura Material Handling is the original producer of the Self-Dumping Hopper. Founded in 1915, Roura has invested over 95 years of resources to product development, maintaining leadership in the industry and keeping the Roura hopper best in its class in the material handling industry.

STANDARD SELF-DUMPING HOPPER PRODUCTS

DURABLE HOPPERS

(2,000 – 4,000 lbs. capacity)

The Durable hopper can safely handle loads up to 4,000 lbs. that require lightweight material handling applications.

RUGGED HOPPERS

(4,000– 8,000 lbs. capacity)

The Rugged hopper can safely handle loads up to 8,000 lbs. that require heavy material handling applications without sacrificing strength and durability.

ULTIMATE HOPPERS

(8,000– 10,000 lbs. capacity)

This ultimate hopper can safely handle loads up to 10,000 lbs. that require extra heavy material handling applications in the harshest environment without sacrificing strength and durability.

OPEN SIDE HOPPER

(4,000– 6,000 lbs. capacity)

The open side self-dumping hopper is the perfect product to handle long linear length material handling applications. Roura's open side self-dumping hoppers are available in 1 and 2 cubic yards to solve the long linear length material handling requirements.

ROTATOR BOX

(2,000 - 6,500 lbs. capacity)

The rotator box is designed for the collection and storage of bulk material. These boxes can be dumped with a rotating fork attachment. Roura's standard line of rotator boxes are available from 1/2 cubic yard to 3 cubic yards to solve all bulk material handling requirements.
