## CASTERS/WHEELS

Roura provides caster and wheel sets in a variety of combinations to fit your specific needs. A complete set includes two swivel rear casters and two rigid front casters. All swivel wheels are mounted on kingpin less swivel rigs. The following information will allow you to choose the right type, size and rig combination for your application.

### Ductile Iron Wheel

(Size 8" x 2") For use on rough floors with metal chips and debris. Easy rolling, crowned wheel face for easy turning. Available on models up through 680 and capacities up to 5,000 lbs. Semi-Steel is substituted for Ductile Iron for sizes 4" x 2", 6" x 2", and 10" x 3". 10" wheels are capable of withstanding 8,000 lbs. loads.

### Phenolic Wheel

(Sizes 4" x 2", 6" x 2", 8" x 2") An easy rolling wheel, quieter than steel, non-marking and spark proof. Resistant to oil, water, and grease. Excellent floor protection and can be used on smooth or rough floors. Available on models up through 680 and capacities up to 4,000 lbs. per set.

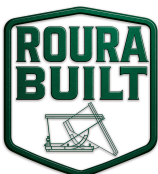

### Polyurethane Wheel

(Sizes 4" x 2", 6" x 2", 8" x 2" and 10" x 3") A quiet rolling wheel with a molded-on polyurethane tread on a steel core. Non-marking, resists oil, water, grease, and most solvents. Available on all models up through 680 and capacities up to 4,800 lbs. for 8" wheels and 8,000 lbs. for 10" wheels.

### Polyolefin Wheel

(Sizes 4" x 2", 6" x 2", 8" x 2") An easy rolling non-marking wheel with high shock and impact tolerance and good resistance to most chemicals. Can be used on smooth or rough floors. Available on models through 680 and capacities up to 3,600 lbs. per set.
