Return Policy

If a customer receives our product and is unsatisfied due to a rare manufacturing defect, the product may be returned and will be replaced under warranty with Roura being responsible for the return freight charges.

If a customer receives our standard product and the customer changes their mind or discovers an error was made when they ordered the product, the product must be returned within 45 days of the invoice date but will be subject to a 40% restocking fee and the customer will be responsible for any return freight charges. If the standard product contains any options, the customer will be responsible for the full cost of all options. All product must be returned unused and damage free.

If a customer receives our standard product with damage or missing product from a carrier we set up, the customer must note this on the Delivery Receipt and Roura must be notified immediately to report the damage or missing product. We ask that the customer take digital photos of any damage if possible so that we may file a freight claim with the carrier.

All returns must be accompanied by a Roura Return Material Authorization (RMA) number and received at our facility within 30 days of the date of the issued RMA.

There will be no charge for cancellation of standard product providing the cancellation happens prior to the start of production. For all other cancellations, Roura reserves the right to charge the customer for costs incurred for labor and material.

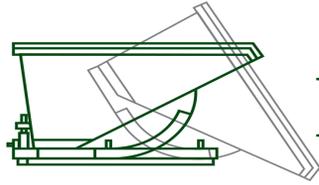

See below for a listing of what products are returnable and what is not:

RETURNABLE:

Standard Hopper Models: Durable, Rugged and Ultimate 1/8 YD through 5 YD

Standard Rotator Models: Durable, Rugged and Ultimate 1/2 YD through 3 YD

If standard product contains any options, the options are not returnable for credit.
